CAREER OBJECTIVE

Enthusiastic B.Tech Information Technology student with strong foundations in Java, Python, and full-stack web development. Proficient in Django and Deep Agents, with hands-on experience building secure web applications, REST APIs, database-driven systems, and multi-agent AI applications. Amazon Future Engineer certified in Java DSA. Passionate about writing clean, scalable code and solving real-world problems through software. Seeking a Software Engineering Internship to contribute to product development and grow engineering skills in a fast-paced product-based environment.

EDUCATION

Bachelor of Technology, Shri Vishnu Engineering College for Women Expected 2028
CGPA: 8.80 /10

TECHNICAL SKILLS

Programming Languages	Java, Python, C, HTML, CSS
Frameworks & Libraries	Django, REST APIs, LangChain, Bootstrap
AI Technologies	Deep Agents, DuckDuckGo Search
Databases	MySQL, PostgreSQL
Developer Tools	Git/GitHub, VS Code, Docker
Core Concepts	OOP, Data Structures & Algorithms, MVC Architecture, Multi-Agent System Design, Authentication

Authorization

INTERNSHIP EXPERIENCE

AI Intern July 2026 – September 2026 (Ongoing)
Infosys Springboard (Virtual Internship) Remote

- Developed an AI Startup Idea Validator, a multi-agent platform that evaluates startup ideas through market research, competitor analysis, SWOT analysis, MVP recommendations, and go-to-market strategy generation.
- Designed and integrated specialized AI agents using the Deep Agents framework with DuckDuckGo Search to retrieve live market data and enable real-time business validation.
- Implemented a centralized shared-state architecture that allowed AI agents to exchange context and intermediate results, ensuring efficient multi-step workflow execution.
- Integrated DuckDuckGo Search to provide real-time market and competitor data for downstream AI agents, improving the accuracy and relevance of startup validation.
- Built a Streamlit-based user interface with FastAPI, PostgreSQL, and Docker, enabling founders to generate validation reports and interact with an AI-powered conversational advisor.

PROJECTS

Smart School Management System Website Python, Django, MySQL, HTML, CSS, JavaScript

- Architected and developed a **full-stack web platform** for managing grades 1–10, featuring secure staff login with **role-based authentication** using Django’s built-in auth system
- Built automated **attendance tracking** with real-time mid-day meal monitoring and historical reporting dashboards
- Developed a **marks management module** with automated grade calculation and scholarship eligibility identification
- Engineered an **automated reporting system** for at-risk students by analyzing attendance and academic performance trends
- Designed a **normalized MySQL database schema** with optimized queries for student profiles, scores, and attendance records.

CERTIFICATIONS

- Amazon Future Engineer – Certified in **Java & Data Structures and Algorithms**
- Infosys Springboard – Certified in **Java Programming Fundamentals**
- IBM Skills Network (Cognitive Class) – Certified in **Prompt Engineering for Everyone**
- Google Cloud – **Introduction to Generative AI Studio**
- IEEE Conquer – Certified for successful participation in technical skill enhancement programs

EXTRA-CURRICULAR ACTIVITIES

- **Volunteer Coordinator – College Technical Fest:** Managed event logistics, participant registration, and technical session execution for 500+ attendees; ensured seamless communication and timely operations across multiple event tracks
- **GDG Hackathon Participant – Google Developer Groups:** Collaborated with cross-functional teams to build and pitch solutions under tight deadlines; sharpened problem-solving, teamwork, and rapid prototyping skills while networking with industry professionals
